

Porcelain Tile Care and Maintenance

Residential / Porcelain / Care and Maintenance

You can protect your Mannington Porcelain Tile Floor by following these easy guidelines.

Porcelain tiles require a minimum of maintenance. Sweep thoroughly and mop with a clean damp mop. If necessary a mild household detergent can be used. Do not use abrasive cleaners or brushes with hard bristles.

Clean up spills immediately, use detergent in strengths recommended by their manufacturer, allow the detergent to remain on the surface of the tile as recommended and rinse thoroughly with clean water to remove the detergent and the emulsified residue.

Choose a product compatible for cleaning the tile and grout at the same time. It is strongly recommended that a small test area be used prior to usage of installation, tile, cleaning and maintenance products to determine if the product selected will serve its intended purpose.
